

**NOTICE OF AVAILABILITY**  
**FINDING OF NO SIGNIFICANT IMPACT**  
**The National Center for Forensic Science – The University of Central Florida**

The National Center for Forensic Science (NCFS), a National Institute of Justice (NIJ) program hosted by the University of Central Florida (UCF), has made available to interested governmental/private bodies and individuals a “Finding of No Significant Impact” (FONSI) regarding NCFS’s proposed research activities at its facility in Research Park (Orlando, Florida). The FONSI is supported by an Environmental Assessment (EA), which studied potential environmental impacts associated with NCFS’s research in the areas of Biological and Physical Evidence. The EA considered potential impacts to the natural and manmade environments including: geology, topography, and soils; water resources, biological resources; air quality; noise; infrastructure/utilities; land use; transportation; socioeconomic resources; cultural resources; and human health and safety, among other topics associated with the proposed action. Based on the information gathered during preparation of the EA, NCFS and UCF find that its proposed research will not significantly impact the environment. Copies of the EA and FONSI can be obtained from: The National Center for Forensic Science, PO Box 162367, Orlando, Florida 32816-2367, (407) 823-6469 ([www.ncfs.org](http://www.ncfs.org)). A limited number of copies of the EA are available to fill single copy requests.
